Authors

Help us to produce your artwork to the highest possible standards – in both paper and digital formats

All articles accepted for publication in Elsevier journals are processed using electronic production methods. Submitting your illustrations, pictures, tables and other artwork (such as multimedia and supplementary files) in an electronic format helps us to produce your work to the best possible standards, ensuring accuracy, clarity and a high level of detail.

Visit the Author Artwork website for full information on how to submit your artwork correctly.

authors.elsevier.com/artwork

Full details can be found on all aspects of author artwork:

- Artwork files: file formats, file naming, fonts, acceptable media and sizing of artwork
- Multimedia files: movies/animations, imaging, audio files, application-specific files and archives
- Colour artwork: RGB/Greyscale artwork, RGB/CMYK artwork, monitor calibration and colour information
- Scanning: scanning of colour artwork, combination artwork, greyscale artwork and line artwork

Whether you are sending your artwork in electronic files or on disk, for best results please follow the guidelines and checklist.

Remember, an image that looks acceptable on a computer may not reproduce well in print or online, so it is important to ensure that these guidelines are referred to.

Practice made perfect

We see a way to increase productivity by combining high-quality 2D, 3D and 4D imaging performance in a single transducer*

We see a way to automate fetal biometry, helping you perform measurements up to 50% faster

Proven Outcomes in Ultrasound.

Your practice is dedicated to ensuring that patients receive the highest-quality diagnostic care. With the value-performance **SONOLINE G50™ ultrasound system**, we ensure that you have an even greater capacity to provide it. The best-in-class, all-digital G50 system is perfectly suited to OB/GYN practices, offering significant diagnostic enhancements: *four*Sight™ 4D ultrasound imaging technology, a practical, user-friendly solution that seamlessly integrates 4D imaging directly into daily workflow. Axius™ automated OB calipers,* for more rapid fetal biometry. And SieScape™ panoramic imaging, for extended field-of-view images acquired in real time. Contact your Siemens ultrasound representative today for more information on the G50 system. Because it's helping make perfection a daily practice.
